Key:

Max = Average daily maximum air temperature at 1.2 metres, read at 0900 GMT
Min = Average daily minimum air temperature at 1.2 metres read at 0900 GMT
Mean = Average daily mean air temperature (0.5 * max+min)
Rain = Average monthly precipitation in mm, read at 0900 GMT (includes melted snow and hail)
Sun = Average daily sunshine hours, based on area values from Campbell-Stokes recorders
30 cm = Average earth temperature at 30 cm depth
1m = Average earth temperature at 1 metre depth
msl p = Average air pressure at 0900 GMT reduced to msl, mbar
Dry = Average number of dry days (days with less than 0.2 mm pf precipitation)

Wet = Average number of wet days (days with 1.0 mm or more)
AF = Average number of days with air frost (min temp at 1.2 m below zero degrees)
GF = Average number of days with ground frost (min temp at grass tip level below zero degrees)
SN = Average number of days with snow falling, (00 to 24)
SL = Average number of days with snow covering at least 50% of the ground at 0900 GMT
TH = Average number of days with thunder heard, (00-24)
HA = Average number of days with hail (00-24), includes all ice meteors except snow
FG = Average number of days with fog at 0900 GMT (Visibility less than 1km)
All temperatures in degrees Celsius
Spr = Mar, Apr and May, Sum = Jun, Jul and Aug, Aut = Sep, Oct and Nov, Win = Dec, Jan and Feb
